

# THE EMPRESS EXPRESS

VOLUME XVIII. No. 23

EMPRESS, ALTA. THURSDAY, Nov. 6, 1930

Price: \$2.00 Per Year.

## United Church

Church School 2:00 p.m.  
Public Worship, 7:30 p.m.

### ARMISTICE SUNDAY

Armistice Day Service will be conducted and we specially invite every war veteran to attend. Armistice Sunday has become a "national institution" on both sides of the Atlantic, and we want you to help us honor it.

Appropriate music will be provided by the choir. Let us, on this day, remember the Lord, our God, and worship Him.

There will also be services at  
Wainfleet, 11:00.  
Laford, 2:00 p.m.  
Social Plains, 3:30 p.m.  
Rev. Geo. A. Shields,  
Minister.

## Catholic Church Supper Draws Large Attendance

The Catholic Church basement was a cheery place on Saturday evening. Nicely decorated and lighted, lined with tables, loaded with good things to eat, and a large and merry crowd enjoying the good things provided; the spectacle was a pleasant one. The ladies of the church were kept very busy attending to the wants of their numerous guests. It is pleasing to learn that the ladies were "greatly surprised at the large attendance and patrons were delighted with the excellent meal which they provided."

Mr. and Mrs. McDowell and family, have moved into the residence formerly occupied by Mr. and Mrs. J. Schofield.

## Anniversary Supper And Entertainment Are Most Successful Events

There was a very large patronage and attendance to the Supper and Entertainment at the United Church, on Monday night, in commemoration of the Anniversary. The Ladies' Aid who had charge of the undertaking received many compliments on the tastefulness of the fare provided. The attendance exceeded expectations, so that towards the last the stock in hand had become very low and more food supplies had to be obtained. However, the ladies rose to the occasion and supplied all comers with appetizing fare.

The church building was filled to capacity for the entertainment. All the numbers on the program received hearty applause and encores. The program was as follows:  
Orchestra number.  
Piano solo, Mrs. J. N. Anderson.

"Oh, Hush Thee, My Baby,"  
"Come to the Fair," Choir.  
Vocal duet/Mrs. E. McCune and Mrs. J. McNeill.  
Vocal solo, Mr. J. Rydford.  
Reading, Miss B. Maxwell.  
Orchestra selection.  
Vocal quartette, Mesdames T. Rowles, L. H. Shannon, Messrs. Acton and T. Rowles.  
Vocal solo, Mrs. A. K. McNeill.

Address by Rev. Sterling.  
Piano duet, Mesdames Kelley and Anderson.  
Violin solo, Mr. Glinther.  
Vocal duet, Mesdames L. H. Shannon and A. K. McNeill.  
Orchestra selection.  
"God Save the King"  
Rev. Geo. A. Shields, took the chair.

## Saturday, November 22

Beginning at 3:30 o'clock

### UNITED CHURCH

FISH POND      TEA WILL BE SERVED.

The Tilley East Area  
(out from last week)

**Movement of Settlers.**—Steps have been taken by means of exchange of land to move settlers from depopulated, poor localities to a more suitable location nearer the centres of population, where the land is better, and their children will have a better opportunity of securing their education.

Exchange of lands have also been effected to enable settlers to consolidate their holdings.

These exchanges it is hoped, may result in helping towards the solution of the educational problems throughout the area, and also places the settlers who have taken advantage of such action, in a more advantageous position as far as agricultural operations are concerned.

**Re Dominion Leases.**—A large proportion of the area is held by various parties under lease from the Dominion Govt. and in several instances satisfactory arrangements have been made with the Lessees to relinquish some of their holdings and, by granting them additional lands controlled by the Board, has enabled provision to be made for the requirements of other ranchers in the immediate locality, at the same time improving the position of the Dominion Lessee.

**Re Education.**—School Districts in certain parts of the area are experiencing considerable difficulty in successful operation, but up to the present the Board has no control over such matters. It is hoped, however, that in the fairly near future, sufficient powers will be delegated to the Board, to enable them to try and meet the situation, and it is thought that by a scheme of equalizing the basis of taxation and centralizing school districts, it may be possible eventually to find a solution of this most important question.

**Development.**—The rate at which the Board will be able to improve and bring additional lands under production by providing watering places must

necessarily depend upon the amount of revenue derived from the area, and the cost of administration. In the latter respect it should be noted that two of the members of the Board receive no remuneration for their services, but have assumed their duties and responsibilities in this regard in addition to their regular government work, whilst the third member is only paid salary and expenses for such time as he is actively employed on Board business.

From this it will be observed that economy of administration is being practiced and it is up to the residents of the area to play their part by securing and paying for such land as they may require for grazing purposes instead of endeavoring to evade the law. It is hoped to have been the practice of some in the past few years. It cannot be expected in working out the problems presented that it will be possible to satisfy everyone. Numerous tangles and conflicting applications have already been dealt with, which in the great majority have been ironed out and settled in a fair and equitable manner and to the satisfaction of the interested parties.

It should be borne in mind that the personnel of the Board have other duties to perform, and they have not an opportunity to devote their whole time to the problems presented, but it is felt that in view of the time that has elapsed since the Board started to function, considerable progress has been made, and that by securing the sympathetic co-operation of the residents it may be possible to make the area more prosperous and contented community.

**Future Leases.**—It should be particularly noted that the Board will again take under consideration application for leases on February 15, 1931. Such leases will commence on March 1st, 1931, and it is the hope of the Board that it will be able to extend the tenure of leases to cover a term of years, though in some two instances it may not be possible to grant

## McCallum-Leach

A quiet and pretty wedding took place on Wednesday afternoon, October 20th, at Knox United Church, Calgary, when Margaret, eldest daughter, of Mr. and Mrs. G. McCallum, of Harthill, Lanarkshire, Scotland, was united in marriage to Mr. William Leach, of Empress, Alta. Rev. Dr. G. A. Dickson was the officiating clergyman.

The bride was prettily attired in blue and carried a bouquet of Madame Butterfly roses. She was attended by her sister, Jean, who also was attired in blue and carried a bunch of the same variety of roses. The groom was attended by Mr. G. Lawrence of Calgary.

Following the ceremony, a wedding dinner was held at the home of the bride's cousins, Mr. and Mrs. Geo. A. McLennan, of Calgary. Afterwards the bridal couple left for the coast. They will reside at Empress on their return.

## Armistice Day Service On Tuesday, Nov. 11th

There will be a short service at the Cenotaph on Tuesday morning (Armistice Day, November 11th) to observe the two minutes silence.

All members of the I.O.D.E. are asked to attend, also the general public are asked to join with them in this great observance. Commences at 10:45 a.m., presided over by Rev. Geo. A. Shields.

## Report of Cream Prices

For the week ending Oct. 25th, 1930, the following prices were reported paid by creameries per pound of butterfat, in several grades of cream, and at the points shown:

Jasper Dairy, Edmonton Special grade, 32c. No. 1, Calgary Creameries, special grade, 29c., No. 1, 27c., No. 2 24c. Minimum: Special grade, 27c. No. 1, 25c., No. 2, 22c.

## CARD OF THANKS

The ladies of the Empress Catholic Church, wish to thank the people of town and surrounding country, for their kind co-operation in connection with the dinner served on Saturday evening.  
—The Ladies Altar Society.

## The Empress BAKERY

Get Your Bread, Cakes  
\*and Pastry from us.

Town Deliveries made if required.  
Bread 10c. a Loaf

## MURRAY The Baker

## Make Your Card Selections

We have a very choice assortment of Greeting Cards on hand. We will print your name and address on them on orders of a dozen up at a price below that of card agents. See this selection. They are extremely choice and dainty, you will be disappointed in buying elsewhere.

long term leases at the present time, owing to a conflict of applications. It will therefore be to the advantage of all interested parties to have their applications in by February 15, next.

Wm Hewlett, Secretary.

with Belle Bennett, Lewis Stone and  
Robert Montgomery

Showing

Nov. 14 and 15

## At last a really Personal Xmas Card

It is now possible to have your Christmas cards made to order from your favorite snap-shots.

We invite you to inspect our catalogue of illustrations. This is something new.

Local agents for: Swift Current, Medicine Hat, Calgary, Saskatoon, Regina and Edmonton, Florida. We order from the nearest point.

EMPRESS DRUG CO., Ltd.

## Special on Overcoats

Just Arrived

### Blue Heather Overcoats

fully lined with Tweed Cloth. Deep Cloth collars for Winter. Sizes 36 to 42. Just the garment for fine, bright Winter Weather.

We made a real buy on these and are passing this big saving on to you.

At the low price of \$10.25 each.

English Blue Whitney Overcoats  
heavy-weight. A real buy at \$20.00.

"SANDY'S"

# Livestock Is Shown To Be A Prime Factor In Economic Development Of The West

A popular idea is that revenue in the Canadian prairie provinces is derived almost wholly from grains. A second idea is that the growth of home-steady vastly increased grain production at the expense of livestock and cut down drastically the number of head of livestock between the Great Lakes and the Rocky Mountains. Both ideas need considerable revision.

The rapid settlement of the Prairie Provinces made possible by grain growing has been accompanied by an increase in livestock that has more than compensated for the reduction in ranches, so far as numbers are concerned. Self-maintaining farming demands the raising of livestock and the change in the West in this respect within the past decade or so has been remarkable. Today, though the livestock industry in Manitoba, Saskatchewan, and Alberta has only touched the edge of possibilities, the number of head of livestock in the prairie provinces is an important percentage of the whole in the Dominion. The fact has great value economically for it tends to spread agricultural wealth more evenly over the farming than is possible with grain raising only.

The four western provinces have now more than three times as many cattle, more than four times as many sheep and nearly eight times as many swine as there were in the most prairie range day. Comparative figures for the year 1901, when complete records were first gathered, and 1920, are as follows:

Year	Cattle	Sheep	Swine
1901	1,066,627	215,990	241,794
1920	3,515,010	1,141,570	1,728,000

It is interesting to examine the figures representing the livestock production of Western Canada for the last eight years. In arriving at the total it is difficult to gauge the number of head of livestock slaughtered on farms for home use and by local butchers and at small, unreported killing plants. The Dominion Bureau of Statistics finds that in the case of cattle is estimated, slaughtering runs about forty per cent. of the yearly estimated total kill in Canada, hogs about forty per cent., and sheep about forty per cent. By making the necessary adjustments, therefore, on the inspected slaughtering in the Western provinces a fairly close estimate of the total or unreported killings may be made.

Total figures representing some seven and one-half million cattle, over eighteen million hogs and about two and three-quarter million sheep look to the credit of Western Canada at first glance. When it is found by further figuring that for the same period 15,398,007 cattle, 47,481,905 hogs and 10,905,428 sheep and lambs are the estimated total killings in the whole Dominion of Canada, a slightly different aspect of the picture is presented. Continuing with the comparison it is seen that Western Canada produced roughly 48 per cent of the total livestock of the Dominion of Canada, and about 25 per cent of the sheep and lambs.

It is this fair share of the total, or could Western Canada, everything considered, have been expected to produce a greater percentage of the total if only livestock production is considered in terms of acres of land under cultivation and suitable for cattle production one might form the opinion that the West would be marketing two-thirds or three-quarters of the Canadian total, but when the hundreds of millions of bushels of grain that Western Canada ships annually are considered the conclusion is reached that while there is room for great ultimate expansion of the cattle industry there, the West is possibly for the moment carrying a fair share.

Swine production figures, however, are not so easily disposed of in that manner. The fact that so much

grain is being produced on the prairie provinces was one to believe that the West should be the source of the heaviest hog shipments in the Dominion, for swine production goes hand in hand with grain production. It is an axiom that nowhere can hogs be produced more cheaply than at the fountain head of the grain supply. Yet Eastern Canada, with very small grain fields, although having a certain advantage in the matter of dry-by-products, turns out nearly two hogs for every one that comes from the West.

The following table, showing number of bushels of wheat and all other potential feed grains produced for every hog in the prairie provinces respectively, indicates that hog production in the older provinces has become more or less stabilized in relation to their grain supply, but it also points out the possibilities open to swine men of the West.

Ratio of Bushels of Grain Per Hog	1911-12	1912-13	1913-14	1914-15
Manitoba	118	121	102	92
Quebec	70	81	85	72
Ontario	109	110	110	100
British Columbia	104	90	105	121
Manitoba	680	498	499	394
Saskatchewan	650	571	654	604
Alberta	384	281	230	334

With such low production in relation to grain supplies it would appear that the West has the potential of grain available to increase hog production in the East but great advantage in swine marketing might reasonably be expected in the west, not distant from Saskatchewan, Manitoba and Alberta. The difficulties attending the marketing of the immense quantities of low grade wheat and feed grains of the 1920 crop, and apparently more serious consequences on the moving of the short high grade wheat crop of 1920, as also the feed grain crop, should commend to far-western farmers the idea of turning out of some of these feeds at the greater relative returns obtainable through cattle and sheep.

Some agitation was caused by the fact that last year Canada's net imports of lamb and mutton were over three and three-quarter million sheep. Yet the per capita consumption of lamb and mutton in this country is only about 6.5 lbs. Does not this point out an opportunity for a substantial increase in production of these meats, first to meet the competition of the imported product, and second, with a view to making a more important item in the average family menu? Western Canada with only 25 per cent of the present production seems to lag in this respect, as sheep are probably the best livestock to assist in the re-habilitation of run down and dirty grain farms.

Canada should be able at least to feed all her people entirely on Canadian grown livestock products, and should be able to market them at competitive costs with any other country in the world. We have all heard everything said to insure success in such competition; the one essential thing lacking at present seems to be a definite program and plan of production.

## The Method In Ireland

People Resort To Tricks When Hunters Disturb Them  
Tired of the "careless hanging" the guns of game hunters, people living in the vicinity of a lake in Cork, Ireland, resorted by use of stones, bricks and mud. Since the opening of the hunting season there was a full tide at dawn and dusk. As the district is not regarded as a game preserve, few who shot birds could not be touched by law. City officials told the protesters that they were powerless and the City Corporation met and gave no reply. Alderman Daly moved to request the Minister of Justice to issue an order declaring the lake a sanctuary. But the peace-seekers could not wait that long. When the sportsmen next appeared, men, women and children met them with a fusillade of missiles. Sportsmen and dogs beat a hasty retreat, some men dropping their guns as they ran.

## Owned Valuable Coin

After walking around for several months with a \$20 gold piece minted in 1847 in his pocket, Charles La Bounty, of Toledo, decided he'd look up the coin in a catalogue and see how much it was worth. You could have knocked him down with a feather when he read that because of the peculiar thickness of the design it was worth \$2,500.

## NORTH AMERICA'S CHANGING GOLD PRODUCTION

North America is, next to Africa, the chief gold-producing continent, usually contributing about one-quarter of the world's annual gold output. Within the past decade the North American production of the yellow metal has rather more than held its own, but this showing has been due entirely to the fact that Canada's rising output has been sufficient to offset the declines in the United States and Mexico. Ten years ago the gold output of the United States was three times as great as that of the Dominion. Today the two countries are almost on a par in that regard.

## Sheepmen's Opportunity

Demand For Mutton and Lamb Is Steadily On the Increase

Riposte from some leading sheep producing countries is that a reduction in the flocks is taking place. The Bureau of Agricultural Economics in the United States believes the decline will continue for the next two or three years. This should suggest to Canadian sheepmen a policy of "waiting in." Our total sheep number is insignificant compared with the estimated total of about 700 million for the whole world. Still more to the point, it is actually too small for a country of ten million population in which the demand for lamb and mutton is steadily going up. The per capita consumption of these meats is still a long way from being equal to that of some other countries and the indications are for a steadily growing demand for good quality Canadian lambs for a long period.

In the United States the unwisdom of going out of sheep too strongly is hinted at by the Bureau when it states: "The individual producer is advised to consider carefully his feed supplies and the long-time outlook for the sheep industry, in making his plan for next year. Where feed supplies are available he may find that under present conditions offer a good opportunity for improving the quality of his breeding flock."

## Predicts Growth Of Dairying

Manitoba Dairy Commissioner Notes Steady Increase Of Industry In The West

L. A. Gibson, dairy commissioner for Manitoba, states that he never saw a better show of butter than that exhibited by Manitoba at the Toronto Exhibition. He noted a steady growth of interest in the dairy industry of the West, and pointed out that in Manitoba alone the sale of better, cheese, cream, milk and other dairy products amounted now to \$15,000,000 a year. He believed that the next few years would witness an even greater growth in dairy production.

## World's Grain Show

Many Countries Have Signified Their Interest In Being Represented  
Belgium has officially accepted the invitation to take part in the World's Grain Exhibition and Conference at Antwerp, from July 26th to August 6th, 1932. Some little time ago official invitations were sent from the Dominion Government to all countries inviting them to participate and a number of these have already signified their desire to do so. They include Peru, Yugoslavia, Czechoslovakia, New Zealand, Poland, Czechoslovakia, The Netherlands and Belgium.

The first sandshark from an oo roated before 5,000 people at a recent charity event at Camp Heath, England, was sold for \$22.75.

## New Variety Of Barley

Is Practically Barrenless and Gives Good Yield Per Acre

There should be more barley grown on Canadian farms, especially dairy farms. Tests made in several provinces have shown again and again that barley, on the average, produces more pounds of feed per acre than does oats and that the feed is worth more per pound. And yet the crop is not commonly grown. The reason is not far to seek. Few people care to wage war with barley weeds. They would rather take the smaller returns per acre from oats than undergo the discomfort of threshing barley and handling the straw through the winter. This battle with barley weeds, however, is no longer an argument against barley.

Several stations announce new varieties of barley that are either barless or have short awns. One of these new barless varieties is Iowa and called "Velvet," was tested against the O.A.C. No. 21, the most popular variety in Canada. The new smooth awned variety gave an average yield of 39.37 bushels per acre as compared with 35.17 for the popular variety. When it is considered that barley fits as well into the cropping system as does oats and that it is a better nurse crop for grasses and clovers the argument for a larger use of the crop would seem to be complete.

## Reclamation Scheme

Proposed To Reclaim 700,000 Acres In Carrot River District

Formation of an organization similar to the On-to-the-Bay Association to advance the proposed reclamation scheme for the Carrot River (triangle) was urged by H. F. Bickie, prominent northerner, in an address before the local Rotary Club at The Pas.

Quoting Federal Government and other reports, Mr. Bickie outlined the various schemes proposed to turn the triangle into a great farming country. The triangle lies southwest of The Pas and most of its area is in Saskatchewan. It consists of about 1,086 square miles, or approximately 700,000 acres. Mr. Bickie pointed out that Premier Anderson, of Saskatchewan, had promised to give the matter consideration after that province had assumed control of its natural resources. However, he asserted, an active association is needed in northern Manitoba to keep the project alive.

Manager: "You're late today, Miss Brown."  
Typist: "Yes, sir! I fell down stairs."  
Manager: "Well, that didn't do it?"

Certain kinds of water plants are deadly foes of breeding mosquitoes, and one species of waterweed, the bladder-wort, actually swallows and digests the wigglers.

## GERMAN BATTLESHIP "HESSEN" FIRING A BROADSIDE

Photograph taken during the recent German manoeuvres shows the "Hessen" firing a broadside. The manoeuvres are at Kiel Bight.

# Veteran Canadian Explorer Returns To Atlantic With Relics Of Franklin Expedition

Satisfied that all the information which it is humanly possible to discover regarding the fate of the Sir John Franklin party, which perished among the Arctic islands off the mainland of Canada 83 years ago, has been gleaned, Major L. T. Burwash, veteran explorer, returned to Ottawa with a number of relics.

Their discovery in an abandoned camp on King William Island, between Victory Point and Lady Jane Franklin Point, added little to what was already known, beyond definitely establishing the locale of at least one staying place in the long trek which appears to have ended hundreds of miles south, on the Canadian mainland, near the mouth of Back's Fish River.

The fragment of a canvas tent, circular in shape, and lending color to the assertion that this portion had been frozen to the ground while those occupying it had torn away the remains, pieces of a heavy broadcloth, some inch-thick rope, and the rusted blade of a knife constitute Major Burwash's find. He also recovered two graves on King William Island, but from these nothing could be gathered. Of the grave of Sir John Franklin himself, no trace was found.

In spite of the 80-odd years that have elapsed since the two ships, " Erebus " and " Terror " set out in an attempt to discover the North West Passage, a certain fascination continues to surround the expedition. For 70 years a veil of silence has shrouded them and only one scrap of paper has ever been discovered relating to the expedition. This was the report and message found on King William Island by the search expedition of Captain McClintock in 1857. The message, signed by Sir John Franklin, stated how the two ships had wintered at Beechey Island in 1846, and that all was well. But marginal notes on the paper written by another hand at a later date, conveyed the information that Sir John Franklin had died in June 1847. The notes gave the strength of the party as 105 and they proclaimed their intention to essay an overland journey from King William Island to the Canadian mainland at Back's Fish River.

## Raise More Geese

Good Returns Obtained On A Very Small Investment

Geese raising does not receive the attention by the farming community that the business warrants, assert poultry experts of the Dominion Department of Agriculture. The farm is the natural habitat of the geese, providing those two great essentials for successful geese raising - free range and an abundance of green foods. Raising a flock of geese is one means by which the farmer can reap a good reward with a very small investment and comparatively little labour. Geese command a good price on the Christmas market and the demand is always greater than the supply.

## Finds Five Daughters Expensive

Pleading guilty before the city magistrate of Mysore, India, to the theft of jewels from the Panama Kristiansen Temple, the high priest testified that his salary was only \$7.85 a month. He added that he had been "cursed" with five daughters, and that his husbands were not able to keep them, he was compelled to maintain their families as well as his own.

Somebody has been asking, "What becomes of pins and needles?" The answer is that they disappear after a brisk rubbing of the affected part.

That this trek was attempted is clear from Eskimo tradition. In 1850, Dr. John Peck of the Hudson's Bay company, surveying the coastline in that neighborhood, encountered natives who were then using tableware and other utensils which bore the mark of the Franklin expedition. They informed him that years before a group of white men had been seen struggling across the ice to the mainland, "lying as they walked." Verification of the Eskimo tradition was secured at Starvation Cove, where later expeditions located about 40 graves.

The purpose of Major Burwash's flight to King William Island, was, in part, to verify, if possible, the story of an American mining engineer, named Jenne, who, many years ago, originated a report concerning the Franklin party which would have placed the party at the mouth of the Interior, from T. W. Jackson, of Vancouver, B.C. In his report to the minister, Major Burwash definitely established that the Jenne story was without foundation.

With two companions, Pilot Gilbert, of the Western Canada, was in part, to verify, if possible, the story of an American mining engineer, named Jenne, who, many years ago, originated a report concerning the Franklin party which would have placed the party at the mouth of the Interior, from T. W. Jackson, of Vancouver, B.C. In his report to the minister, Major Burwash definitely established that the Jenne story was without foundation.

Over 2,000 photographs were taken by Mr. Fennie during the flight. These will be of great value to topographers in correcting many inaccuracies regarding the coastline of the mainland and the islands over which the party flew. Many fresh water lakes some distance inland, he prosecuted his search between Victory Point and Lady Jane Franklin Point. Having made his way to Beechey Island, he found the Coppermine River, to Beechey Point, the magnetic pole-and-thence to King William Island. ## May Challenge For America Cup

Plan Is Urged For Canadian Yacht To Make The Attempt

Entry of a Canadian yacht, particularly one from the Nova Scotia yacht squadron, located at Halifax, as a challenge for America's Cup, is being mooted, now that the "Shamrock V," has been so decisively defeated by the "Enterprise."

Under the present rules of the race, only clubs which have their courses upon the sea, or upon an arm of the sea, may enter the races, and, in any case, the challenger must proceed to the scene of the races under her own sail. This would seem, according to sportsmen, to point to Halifax as the logical location from which a contender for the cup should come. It is the belief of local yachtsmen that financial backing for such an enterprise would not be found wanting.

Should an attempt for America's Cup be made, it would be only the third time in the long history of the races that a Canadian yacht entered. The first attempt was made by the "Countess of Dufferin," and resulted in failure. The second was made by the "Atlantis," five years later. This resulted in considerable ridicule owing to the fact that the "Atlantis" had to be towed through the Erie Canal, and her draught was too great for the artificial waterway. The result was that her hullmen dragged her through the canal she came to one end, and made national news of the picture. As the outcome of this, the ruling that only ocean-going yachts might compete was brought down, thus eliminating all clubs on the Great Lakes from the series.

In view of the "Shamrock's" defeat, a strong effort to have a Canadian yacht represent Canada in another race for the cup will be made, according to yachtsmen.

## Soy Beans Are Valuable

Holds One Of Foremost Places As Forage Crop

The commercial demand for soy bean oil or meal from time to time will fix the value of the various varieties suited to cultivation in Canada in the observation of the minister of the Dominion Department of Agriculture. The correlation between "oil" or fat content and protein he finds is remarkably consistent; the varieties that are high in "fat" being relatively lower in "protein," and vice versa. This is because a matter of view of the fact that there are now some twenty-four varieties of soy beans which have been proven suitable for cultivation as a commercial crop in Canada. The commercial value of the soy bean arises from the oil obtained by expression, and the use of the residue of the bean, which is rich in protein, in the form of meal or cake as a livestock food. Soy bean oil is used in fish canning, paint and soap manufacture; and the soy bean is also an important constituent in many of the popular patent foods now appearing on the market. In addition, as a legume and forage crop it ranks among the best.

## Rainbow Trout

Over 200,000 Fry Collected At Waterton Lakes Park

Over 200,000 rainbow trout eggs were collected in Cameron Lake, Waterton Lakes Park, Alberta, this summer by the fish culture division of the Department of Fisheries, or six times as large a collection as was made in 1929, when rainbow eggs were first collected in that district. The eggs were placed in the trout hatchery. All told, 329 fish were stripped between June 5th and July 2nd, and yielded a total of 201,068 eggs.

## C.P.R. Cattle Win

Western Canadian cattle almost swept the boards in 16 classes at the Washington State Fair, just concluded at Yakima, Wash. The Holstein show herd owned by the Canadian Pacific supply farm at Strathcona, Alberta, won 14 first prize and nine seconds, and also carried off senior, junior and grand championships in both male and female classes.

"What did you think of my medicine?"  
"Excellent! I am no worse."  
—Moustique, Charleval.

W. N. U. 1858

## Tourist Business Brings Revenue

Fourth Largest Industry Has Doubled Within Five Years

While the tourist business this season may not equal that of 1929, this fourth largest industry has doubled in five years' time, according to C. W. Johnston, Montreal, general passenger traffic manager for the Canadian National Railways. In 1929, Mr. Johnston pointed out, this business produced a total revenue of about \$300,000,000, most of which came from American visitors who left in this country 40 per cent. of the vast sum they expended in pleasure and business travel outside of the United States.

"As a result of the economical situation across the line, a number of those who previously travelled extensively in Canada did not return this year, but, on the other hand, many Americans visited here for the first time, and, generally speaking, the tourist trade has been more than fair, to say the least," said Mr. Johnston.

"As to the transportation situation, which today the airway and highway travel is a factor, too, it may be pointed out that the railways have not been over established them, but have improved their whole economical structure. Their contribution to the transportation services rendered the public has remained the major one. Three thousands of employees, through betterment of their wages, have continued to improve their social and economic standing in the community. Disregarding changes of a temporary nature and limited duration, the Canadian railways' financial performance and outlook has improved consistently."

## Livestock Men's Turn

With Low Prices For Grain, Stock Raising Should Prove Profitable

A strong trend toward livestock has set in. While agricultural prices in all the major lines have dropped since last year, the relative price level for livestock is most favorable compared with the level of feeding stuffs. The next few years seem to promise to be the livestock men's turn.

Notwithstanding the effect of dry weather conditions in some parts of the Dominion, Canadian feeding stuffs are in more than average volume. The hay crop everywhere is satisfactory and in some places exceptionally good. There is an unusually heavy carryover of barley and to a less extent of oats and the low price ruling for all feeding stuffs is stimulating livestock production. All the indications are that livestock is at the beginning of an upward swing. If production is well planned now, it should do much to offset the loss to farmers through the low prices of grains, though good productive planning needs a "long view" of conditions, not of prices for stock or feed during a particular season only.

## Great Bear Lake Scenery

The eastern part of Great Bear Lake in the Mackenzie district of the Northwest Territories, Canada, is a magnificent system of fjords and land-locked channels, not unlike the west coast of Norway.

Children of the village school in Kluantan, Mackenzie, sing in seven languages—English, German, Italian, French, Flemish, Greek and Hebrew.

Captain Frederick Christensen, who will command the huge German air liner DO-X, when she starts her trans-Atlantic flight to America in the near future.

Manufacture of typewriters is being started in Poland.

## Suitable For Fruit Growing

Peaches Successfully Produced On Farm At Congress, Saskatchewan

Hon. W. C. Buckie, Saskatchewan, Minister of Agriculture, has had the pleasure of tasting a number of Saskatchewan-grown peaches. Though he didn't get around to taking the odd bit of them, there were also Saskatchewan watermelon and muskmelons. All were grown on Vinecroft Farm at Congress. The farm is owned by R. V. Buils, but is managed by Mr. J. H. Allen. According to Mr. Price, he planned to send Mr. Buckie a sample of muskmelons, peaches, 25-pound radishes, 1,200-pod beans to one plant and a new climbing cucumber he has developed. His peaches, said Mr. Price, he guaranteed to develop from seed in 80 days. He was positive that Saskatchewan soil could produce such fruits in other places than Congress also.

Mr. Price said he has been laboring in the interests of the Department of Agriculture of Saskatchewan since his arrival. He plans to return to his home in Belfast, Ireland, in two months time.

## Making Milk Attractive

Children Likely To Take It Readily If It Is Fixed Up

Markets promise a profusion of variety, and food experts point out ways of preparing food attractively, but this is little comfort to the child whose bill of fare is more or less restricted to milk and spinach. Most children abhor spinach, and a great many children stubbornly refuse to drink milk. The benefits of milk when forced on a sobbing, resistant child are questionable, to say the least, and an enterprising mother will dress it up, flavor it and even make up fancy names for it in an effort to make it attractive to her children. There is practically nothing that can do toward making spinach appealing. With several cereal beverages on the market today which are suited to the needs and taste of children, the resourceful mother will find it easy to prepare milk so that the children will actually enjoy it. These cereal beverages, made with plenty of milk, sweetened to taste and served hot, are healthful.

## Didn't Register With Her

The buttonless husband contemplated his jacket, which he couldn't do up. It occurred to him that he might get something done by a little appropriate sarcasm.

So, as he was just about to go shopping with his wife, he remarked: "Oh, by the way, remind me to get some needles and thread when we're out, dear!"

His wife gave a dazzling smile. "You silly, extravagant mule," she cooed, "you can always borrow mine, you know."

## The Magnetic Pole

It is interesting to note that the location of the north magnetic pole by Major Burwash's Canadian expedition near Cape Adelaide, Boothia Peninsula, is approximately where Amundsen placed it from observations which he made between 1903 and 1906; viz. 71 degrees north latitude, 96 degrees west longitude.—Boston Transcript.

Manufacture of typewriters is being started in Poland.

## Mammoth Farms

Dr. Allen Of Saskatchewan University Denies Report That Wheat Factories Were Predicted

"We have never stated that we believed that 100,000-acre wheat factories would replace the present family farms," said Dr. William Allen of the farm management department of the University of Saskatchewan. Statements have appeared in the press that the group of 30 agricultural authorities, economists, and engineers, who recently toured Montana, North Dakota and south-western Saskatchewan, had reported in favor of the mammoth farms as likely to supplant the family size of farm.

The group who made the tour has made no report as a group as they consisted of a number of individuals making their own investigations. Neither Dr. Allen nor Professor E. A. Hardy, the members of the party from Saskatoon, were convinced that the mammoth commercialized farms would supplant the family farm under Saskatchewan conditions.

Lower cost of production per bushel of wheat was found on many of the Saskatchewan family size farms than on the mammoth farms visited in Montana. "The Saskatchewan and Montana conditions are entirely different," says Dr. Allen.

This does not, however, mean that many farms are not too small to be economical, he adds. The changes in farm machinery have increased the size of the unit that can be best worked by a family.

## The Creative Faculty

What Young People Must Need If Familiarity With Their Native Tongue

There is something about the creative impulse, indeed, that seems to require a kind of harness on it before it can accomplish anything: good writing, good music, good painting that has gone before, and then carry on from there. In the case of children, emancipating them from the usual discipline would seem to be especially bad, as few of them will ever be professional writers, and what they most need is familiarity with their language as it is actually used, so that in later years they will at least be literate and able to earn their living. When a girl is eighteen and loses her first job because she cannot spell it will not be very comforting to her to know that at the age of eight she bubbled out a sweet little poem on her doggy and her kitty.—New York Times.

## Prairie and Yukon Fisheries

The product of the fisheries of the Prairie Provinces and Yukon Territories in 1929 was valued at \$4,075,095, compared with \$3,860,562 in 1928. These figures represent the value of the fish as marketed. Manitoba in 1929 contributing \$2,745,205, or 67 per cent; Alberta, \$732,214, or 18 per cent; Saskatchewan, \$578,271, or 14 per cent; and the Yukon Territory, \$24,805, or 1 per cent. Whitefish was the chief catch, representing 34 1/2 per cent. of the total value of fisheries production.

## Deed Penalties

Harry McNeil, member of two Antarctic expeditions, with Captain R. F. Scott and Lieutenant Sir Ernest H. Shackleton, died recently at Wellington, New Zealand, penalties at the age of 64.

Postal savings in Japan are \$160,000,000 greater than a year ago.

## Keeping Tab On Salmon

Impressive March Past Of Over 9,000 Sockeye Is Witnessed

An impressive march past of over 9,000 sockeye salmon was seen recently at Stamp River Falls, B.C. The fish took from June 11th to July 20th to pass the falls by aid of the railway constructed by the Canadian Government Department of Fisheries. A count of the fish was made by the Government Fisheries Guardian at the falls during ten hours of each day in the six week period. As compared with the number of sockeye using the railway in the corresponding period of 1929, there was a very large increase this year. In 1929 the total was 3,512 as against 9,061 this year.

The fallow overcomes a height of some forty feet of turbulent, crashing water and is a means of ascent for many salmon which might otherwise not be able to battle their way to the spawning areas. This year a very large number of sockeye have been able to make their way over the natural falls.

The coastal and inland waters of British Columbia are among the most productive salmon fisheries in the world, and the quality of the salmon carried there is unsurpassed.

## Noted British Persons Have Actual Doubles

At Least Three Who Closely Resemble

Many of London's great, and nearest to home. Lord George Gordon Byron has a double, a near identical portrait artist who usually has two pictures, one of himself and the other of the famous writer, but his resemblance with the chafed inscription: "Which is which?"

A but driver looks enough like Home Secretary John R. Clynes to be a twin. Lord Birkhead's double is a well-known professional man, and an underground railway official is the image of Arnold Bennett. Lord George has at least three doubles, while recently a man run up to a prominent first-nighter whom he mistook for H. G. Wells, to congratulate him on his latest book.

## Rust Dusting Pays

Rust Can Be Controlled

A decided increase in yield in favour of the dusted crops is reported by rust research experts of the Federal Department of Agriculture. Experiments show that the aeroplane is well suited to the dusting of large areas. Not only can rust be controlled by dusting but even in the absence of severe rust infection the beneficial effects of dusting are evident. Sulphur dust is found particularly effective in the control of rust and leaf diseases. In practically every case there was a decided increase in yield in the dusted crop.

## Saskatchewan Pool Elevators

Saskatchewan Pool Elevators Limited, this year are operating 1,004 elevators, out of 1,060 owned by the company; 14 being closed and 12 under reconstruction. The pool elevator system came into existence in Saskatchewan for the crop year 1928-29, when the company handled 11 per cent. of the pool grain of the province and this had risen by the year 1928-29 to 94 1/2 per cent.

Postal savings in Japan are \$160,000,000 greater than a year ago.

## Gulf Stream Benefits Iceland

Warm Water Creates Climate Similar To Southern Canada

Iceland's name naturally suggests to the prospective visitor that he will find a frozen waste. When his map shows this island to lie across the very threshold of the Arctic Ocean, hard by the glacial coast of Greenland, and some miles further north than Meak Labrador, he is almost prepared to come upon a land of polar bears and of fur-clad folk living in snow igloos. But Iceland is libeled both by nomenclature and maps, according to the National Geographical Society.

"On many charts the most important physical fact in Iceland's life does not appear," a recent bulletin of this society says. "Up from the south flows the warm Gulf Stream to the northeast and work the magic of whisking it, in effect, nearly a thousand miles toward the Equator; so that its climate is not that of the polar regions of Europe, Canada or Northern United States."

"On Iceland's coasts are thriving towns with B-roadways, stately mansions and church steeples, blue streets and electric lights. In the streets are men and women garbed in the latest fashions of Copenhagen and Glasgow, Ottawa and Minneapolis. One's eyes tell him that he is in the heart of Europe, that Europe and America know."

"And immaterial factors proclaim the truth," the bulletin states. "More than do material things. Here, in this far northern land, a worthy national literature and stable national policy were developed, and much of Europe was flourishing in the Dark Ages. Here the lamp of a Nordic Renaissance burned and lighted its own region before the dawn of the Latin Renaissance was held aloft to light the way for the world. This northern light has never failed. Today the literacy rate is higher in Iceland than in many countries of Europe."

"The people of Iceland have a great literature of their own in the old sagas, and many of their modern poets are especially gifted. Their folk songs are popular throughout the country and rank with the best of any nation."

## Holstein Record

Moose Jaw Herd Makes Number Of Records In R.O.P. Tests

B. H. Thompson of Moose Jaw, a leading Holstein breeder in the Western Canada, and a director of the Holstein-Friesian Association, has just taken to light the way for the world. This northern light has never failed. Today the literacy rate is higher in Iceland than in many countries of Europe."

The people of Iceland have a great literature of their own in the old sagas, and many of their modern poets are especially gifted. Their folk songs are popular throughout the country and rank with the best of any nation."

## Best Guide To Conduct

Nothing Is As Satisfactory As Following The Golden Rule

The "Golden Rule" is the very best guide to human conduct in all relations in life. It is the best rule in business. It gets better results than crass selfishness. It establishes business on a surer foundation. It gives greater satisfaction to the man in business than a sordid score-keeping. The "Golden Rule" is the best in the professions. It is the best in the home. It is the best in society. In truth, in every relation and aspect of life the Golden Rule is without equal or superior.

## Chinese Library At McGill

Works in the East Chinese Library at McGill University, which reached the 110,000 mark, according to a report by the curator, who points out that a Chinese volume commonly has three to four times the amount of written matter contained in an English book of the same kind. A Chinese character represents, for instance, a whole English sentence.

"We shall have to perform a little operation."  
A large one. Remember the patient is a millionaire.—Buen Humor, Madrid.

## DORNIER SEAPLANE DO-X PREPARING FOR GREAT DASH

Hovering alternately over land and water with occasional swoops down upon both, the giant Dornier seaplane DO-X, flying shark of sea and air, goes about the business of prospecting across the Atlantic to the new world. Luxury of a kind never yet approached in trans-Atlantic air travel is assured the men and one woman who are scheduled to blaze the trail in the magnificently fitted air-water liner. Dr. Claude Dornier, designer and builder of the DO-X, and Captain Friedrich Christian Christensen, its commander, have expressed themselves as completely satisfied with the preliminary tests. In addition to Commander Christensen and Maurice Dornier, the ship is expected to have two engineers, electrician, steward, five mechanics, wireless operator and two passenger correspondents. Above view of DO-X flying over ocean, at about 125 miles an hour, gives one an idea how it will appear upon its flight to America.

## INDIGESTION

Banished by Kruschen

"I suffered for some years from a bad stomach. I used to feel very miserable after meals. The doctor advised me to take Kruschen's. It did me no good. I decided to try Kruschen and am now taking it, and have done for the past 12 months, and I am very glad to tell you that my stomach is now in perfect order. I feel as young in spirit as I was 20 years ago, thanks to Kruschen's." (W. H.)

You know how badly an engine runs when it gets clogged up with the same with your body when your gastric or digestive juices fail to flow. What you need is a tonic—Nature's own tonic—Nature's six mineral salts.

You get all these six salts in Kruschen. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite, where the digestive juices are encouraged to pour out and act upon the food. Again, in the intestinal tract, certain of these salts promote a further flow of these vital juices which deal with indigestion. The result is that it finally for absorption into the system.

## WORLD HAPPENINGS BRIEFLY TOLD

Bound for Germany to negotiate a settlement for accounts outstanding between that country and Canada. Hon. C. H. Caban, Secretary of State, sailed recently from New York.

The London Daily Herald reported that King George V. had been conferred a title upon General Bernard Shaw in recognition of his literary eminence, but that Shaw had declined.

Prince Leopold, of Bavaria, field marshal of Germany and commander of the German army in the east during the earlier stages of the war, is dead. He was 84 years old. Death was caused by pneumonia.

The first woman accountant in the province of Quebec was received into the membership of the Society of Chartered Accountants, when Miss Charlotte N. Howell was presented with her entrance certificate.

Crime in Great Britain has deteriorated so much that prisons are operated far below capacity and several have actually closed for lack of occupants, states Dr. Higgins, medical officer of the prison in Liverpool.

Order-in-council granting a loan of \$50,000 to the Manitoba Cattle Loan Association was passed by the cabinet council. The association secured the money at five per cent. and will charge members seven per cent. for advances secured by lien notes on cattle purchased.

The parliament of New Zealand has approved a scheme to establish a national art museum to include a war memorial and a carillon. The citizens of Wellington have subscribed \$500,000, and the government has granted a subsidy of the same amount.

Frederick Edwin Smith, the first Earl of Birkenhead, statesman, 65 years old, died in London, England, Sept. 30, following a lengthy bronchial ailment. He was at one time British Lord High Chancellor and Secretary of State for India. During the war he prosecuted Sir Roger Casement, Irish leader, who was hanged for his wartime activities.

### Shipping in Sweden

Sweden Maintains Lead in Industry Among Scandinavian Countries  
Sweden maintains its lead in the shipbuilding industry among the Scandinavian countries, according to the latest reports. At the Swedish yards 26 vessels with an aggregate tonnage of 127,000 gross tons were in the course of construction at the end of the first half-year. Denmark comes second with 29 ships of 116,000 gross tons and Norway third with 33 ships of 40,000 gross tons. Of the ships at present being built Sweden has 10 steamers or motorships, 2,000 gross tons each, two motorships of 2,000 to 4,000 tons, four motorships of 5,000 to 6,000 tons, and six motorships of 8,000 to 10,000 tons.

### Shortest Name For Horse

Racer in England Answers To Name Of "O"

There's a race horse in England named "O." This establishes a practically unassailable record for brevity. One suspects that its owner, Mrs. G. L. Redmond, an American, saw an opportunity to attract a little attention by thus naming the nag, although with so many horses running around these days owners have just about run out of names.

In the United States, there is a rule that a period of 15 years must elapse before a name once once used by a race horse can be used again. Over in England the only restrictions are that you cannot name your horse after the winner of one of the "classics" nor for a living person without obtaining permission.

The "classics" are five in number, although the term is frequently abused, the Thousand and Two Thousand Guineas, the Derby, Oaks and St. Leger. Horses winning these races retain their individual names in perpetuity.

### Winnipeg Newspaper Union

(By Eva A. Tingey)

DELIGHTFUL WEAR

All Tingey models are created and sketched in Paris and the patterns are made in New York. If small daughter in wanting some long-sleeved little dresses for the cooler days here is a charming model. Long sleeves are not in demand then this model is equally suitable because the lower sleeve is omitted and Hey Presto!—short sleeves! Very pretty is this dress carried out as the sketch in a fine kasha fabric and some similar thin woolen or wool and cotton. The original in scarlet kasha has yellow and blue blanket stitch (crochet) with dots of the edges, sleeve joints, and cross stitching for wear decorations here and there. Owing to its coloring and trim the model assumes a play peasant air. It is dainty and charming in its short sleeve form in cottons and washing silks.

This pattern may be obtained in sizes 2 to 6. It is ready for immediate delivery. It is hand cut. Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and address, the number of the pattern and the size you want.

### MAJOR L. T. BURWASH

Major L. T. Burwash, noted Canadian explorer, who is back at Ottawa after his epic Arctic flight, during which he mapped the magnetic pole and discovered much to clear up the mystery of the fate of Franklin's expedition.

### Use Of Platinum Suggested For Coinage

But South African Government Finds Difficulties In The Way

The decline in prices has affected even such rare and costly commodities as diamonds and platinum. The government of South Africa has sought to limit production in the diamond fields between the Orange and Vaal Rivers so as to stabilize the diamond market, but platinum is produced in such widely separate areas that any centralized control over output appears to be impracticable. As a substitute for regulated production Dr. George F. Kunz proposes in an article appearing in the Mineral Industry that a new demand for platinum be created by the government's use of it for coinage.

Platinum money is not wholly an innovation, as Russia experimented with its coinage many years ago. But the interesting thing about this proposal is its resemblance to the demand in this country in the past years and minutes of the last century for the unlimited coinage of silver for the same purpose—namely, the stabilization of the price of the metal. The scheme in effect would be a new form of bimetalism. The experience of the United States and Europe during the last century proved conclusively that bimetalism is possible only in theory, as any change in the relative value of the two metals which are supposed to circulate copaciously would drive the dearer metal out of use or circulation.

If a platinum coin became worth more as metal than as a piece of money, it would cease to circulate and be used in the arts; if its face value exceeded the value of its metallic content, platinum that would circulate by being used in the arts would be rubbed to the mines instead, and gold would tend to be displaced from circulation. This would prove a serious problem for the government. The gold standard is far from perfect, but it is the most satisfactory monetary system yet devised. It produces complications enough without the injection of another from the coining of a new metal. And if our people object to the use of gold coin they will object still more to platinum, which, weight for weight, is worth two and a half times as much as gold and is likely also to be confused with silver.

### Conduct Mass On Eiffel Tower

A religious mass was said at the top of the great Eiffel Tower recently, the first time since it was built more than 40 years ago. It took place in the lofty wind-swept little cage 4,000 feet above the earth. A small table was used as an altar and the music which accompanied the liturgy was the breeze. Special tribute was paid to M. Eiffel.

### Made It Balance

The wife had been put on the budget plan. At the end of each month she and her husband would go over the accounts together. Every once in a while he would find an item, "L.O.K. 84."

Finally he said, "My dear, what is this—L. O. K.?"

"Lord Only Knows," she replied.

Mending clothes is accomplished in the same manner as patching an automobile tire, with a mending paste, which withstands washing, boiling and ironing.

A chicken jerks its head when running in order that it may see better. Scientists of Johns Hopkins University declare.

A woman's tongue is her sword—and she never allows it to rust.

W. N. U. 1858

## Tea Biscuits unusually good when made with Magic Baking Powder

If you bake at home send for the New Magic Cook Book. It will suggest many attractive dishes and save time for you.

Look for this mark on every tin. It is a guarantee that Magic Baking Powder is pure and safe to use. It is the only baking powder that is so pure and safe to use.

3 out of every 4 Canadian housewives\* who bake at home, use Magic Baking Powder because they find it gives biscuits consistently better baking results.

Next time you bake biscuits, try Magic and see for yourself how it will help you with your baking.

### Try This Recipe for Biscuits

2 cups flour  
4 teaspoons Magic Baking Powder  
1/2 cup shortening  
1 cup cold sweet milk, salt, and 1 egg  
Method—Sift together flour, magic baking powder, and salt. Cut in shortening. Gradually add cold milk sufficient to make a soft dough as can be handled, using a knife to mix. Flour center of board generously, drop dough on it, pat to soft consistency. Roll out to 1/4 inch thick. Cut into 1 1/2 inch squares. Bake in hot oven. All ingredients should be cold. Handle as little and as lightly as possible and avoid working in more flour than milk has been added.

\*This fact was revealed in a recent Dominion-wide investigation.

### Huge New Glacier Found

Ice Field in British Columbia May Be Largest in World

Bringing back a story of having discovered an ice field that will outlive any previously known, Christian Haider and Ernest Feuz, Swiss guides of the Chateau Lake Louise and Banff Springs Hotel, arrived at Golden, B.C., by using train, motor and pack train.

With Major Longstaffe, of Vancouver, the guides reached the headwaters of the South Gate Littlewood at Toms-River, 160 miles north of Vancouver, in the Cascade range. The sixty state of the rivers convinced the explorers that the streams were glacial fed and so they penetrated the virgin country at the headwaters. Huge snow fields and glaciers estimated at an area of 350 square miles, which they saw and photographed for the first time. Ernest Feuz states that what they saw is only a part of the huge glacial field there.

### Try To Decipher Document

Second Andre Diary Causing Experts Much Difficulty

Experts examining the documents found with the remains of members of the Andree balloon expedition in icy Hivtoen are having difficulty with the second of the Andre diaries, which they believe contains the record of the last days of the trip.

It had been exposed during the 33 years since the death of the three men and its contents are well preserved by the elements.

"If you haven't a doctor," said the tourist at the hamlet inn, "what happens when anyone is taken ill?"

"Oh, they just die a natural death."

### Another Wonder Of Science

New Device Makes Breath A Kind Of Third Hand

As we have heard to wonder at the marvels of science, it is not surprising to learn that inventors have found new uses for the breath of the human body besides just breathing or blowing on one's hands when cold, or on a cup of tea when hot—assuming one is not taking tea when "company" is present.

Dr. E. E. Free, New York, consulting engineer and scientist, comes forward with a device which can be attached to many things, and all one has to do is to blow into a sort of telephone mouthpiece, and it will do a job of work. It makes the breath of a kind of third hand when a person is busy.

For instance, if you are playing the piano, simply blow into the mouthpiece and it will turn a page of music. If typing, you don't need to lift your hand to shift the carriage; simply blow and the carriage will slip back. Blow again and it will open the door of your safe, or open the window. In a plane your breath may manipulate the controls. In the same way you may operate heavy machinery. In fact, there is almost no limit to the possibilities which a little "blowing" may accomplish. Only this is a powerful sort of blowing, not mere windbag stuff.

### Believe It Or Not

Mountain peaks in the Cariboo range are growing taller, according to fur traders at Fairbanks, Alaska. Live tree trunks protrude out from the peaks. A government geological party has been asked to investigate the growth of the peaks.

### Saving For The People

Says Saskatchewan May Save Over \$300,000 In Connection With Freight Hauls On Canned Goods

"People of Saskatchewan will save over \$300,000 this year on canned goods," states Hon. J. A. Merkle, Minister of Railways and Labor. The figure \$300,000 had been given to the department as the estimate of a large wholesale grocery firm with a warehouse in Regina, he said.

"The estimate will be very close to correct," Mr. Merkle said. The rates in effect would continue until the close of navigation on the great lakes and then the matter "will have to be fought out all over again," he added. The government had received the support of the boards of trade of Saskatchewan, the Retail Merchants' Association, and the United Farmers of Canada in the fight, which had been won on July 14 and September 16, Mr. Merkle said in conclusion.

"The stails," we are reminded, "do not applaud so heartily and unreservedly as the pit and gallery." No; they are the reserved seats.

In all Belgium there are only about 12,000 unemployed.

### An Emergency Dressing

Minard's is invaluable as a quick dressing for burns, scalds, and all flesh abrasions. It cleanses and soothes the wound.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE  
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is as flexible as rubber and it allows the full sunlight to enter, instead of the health-giving Ultra-Violet rays, which do not penetrate ordinary glass. It withstands extreme changes in temperature, keeps out cold and wet, but, allowing the full sunlight to enter, instead of the health-giving Ultra-Violet rays, which do not penetrate ordinary glass.

CANADIAN breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

## THE EMPRESS EXPRESS

Published in the interests of  
Empress and District  
R. S. Sexton Proprietors A. Haskin

Thursday, Nov. 6, 1930

Married Peoples' Club meet at the theatre, on next Tuesday.

Monday next is Thanksgiving Day. November 10. Armistice day is celebrated on the same day.

Mr. and Mrs. H. McCune and family, of Madison, Sask., were in town over the week end.

Mr. and Mrs. Glen Russell and family, were visitors to Burdett, for a few days last week.

The Castle Coombe W.M.S., will meet at the home of Mrs. Wm. Kowles, on Wednesday, November 12, at 2 p.m.

If we paid no more attention to our plants than we have to our children, we should now be living in a jungle of weeds.—Luther Burbank.

The High School students present their play, "The Deacon Slips," at the theatre, Friday evening, November 7. Doors open at 8:00 p.m., curtain rises at 8:30 p.m.

It matters not how a man dies, but how he lives. The art of dying is not of importance, it lasts so short a time.—Samuel Johnson.

The Veterans of the Great War are cordially invited to attend the Armistice Day Service on Sunday, November 9th, at 7:30 p.m., in the United Church of Empress.

Mrs. D. N. MacCharles and son, Ed., of Medicine Hat, were visitors in town, on Friday. They attended the dance at the theatre.

There was a good attendance at the Anniversary Service at the United Church on Sunday. Rev. Sterling, of Pelly, conducted the service. Special music was given by choir and orchestra.

You are cordially invited to attend the bazaar to be held by the ladies of the United Church on Saturday, November 22, at 3:30 p.m., in the Church rooms. There will be on display: fancy work, Christmas novelties, knitted articles, aprons and fancy cushions. Tea will be served.

## Notice

All the Lion Tamer's are requested to meet in the Club Rooms on Wed., Nov. 12, at 8 p.m., to discuss business.

## A Successful Dance

The Halloween Dance put on by the Lion Tamer's Club was a howling success. Every one young, old, married and single had a wonderful time. The music supplied by a seven-piece orchestra, was the best heard in Empress for a long time. Everyone is waiting for the next Lion Tamer's Dance. Thanks boys, do it again, we like it.
